

ARIZONA DEPARTMENT OF TRANSPORTATION

REPORT NUMBER: FHWA-AZ88-219

**EVALUATION OF
INCREASED PAVEMENT
LOADING**

Volume II - Computer Program Documentation

Prepared by:

Robin High
Stuart W. Hudson
Stephen B. Seeds

ARE, Inc. - Engineering Consultants
2600 Dellana Lane
Austin, Texas 78746

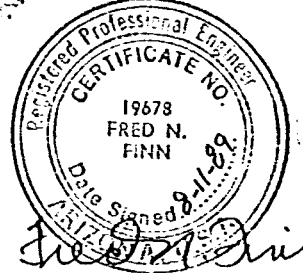

November 1988

Prepared for:

Arizona Department of Transportation
206 South 17th Avenue
Phoenix, Arizona 85007
in cooperation with
U.S. Department of Transportation
Federal Highway Administration

The contents of this report reflect the views of the authors who are responsible for the facts and the accuracy of the data presented herein. The contents do not necessarily reflect the official views or policies of the Arizona Department of Transportation or the Federal Highways Administration. This report does not constitute a standard, specification, or regulation. Trade or manufacturer's names which may appear herein are cited only because they are considered essential to the objectives of the report. The U.S. Government and the State of Arizona do not endorse products or manufacturers.

1. Report No. FHWA-AZ88-219, II		2. Government Accession No.		3. Recipient's Catalog No.	
4. Title and Subtitle EVALUATION OF INCREASED PAVEMENT LOADING Volume II - Computer Program Documentation				5. Report Date November, 1988	
				6. Performing Organization Code	
7. Author(s) Robin High, Stuart W. Hudson and Stephen B. Seeds				8. Performing Organization Report No. AZ-59/2	
9. Performing Organization Name and Address ARE Inc. - Engineering Consultants 2600 Dellana Lane Austin, Texas 78746				10. Work Unit No.	
				11. Contact or Grant No. HPR-PL1-31(219)	
12. Sponsoring Agency Name and Address ARIZONA DEPARTMENT OF TRANSPORTATION 206 S. 17TH AVENUE PHOENIX, ARIZONA 85007				13. Type of Report & Period Covered Final Report - Dec84-Nov88	
				14. Sponsoring Agency Code	
15. Supplementary Notes Prepared in cooperation with the U.S. Department of Transportation, Federal Highway Administration					
16. Abstract The effects of increased truck loads and higher tire pressures on performance of flexible pavements were investigated in this project. This report documents four computer programs developed on the project. Program FEDESAL performs equivalent load calculations using static truck weight loadometer data. Program WIMESAL performs equivalent load calculations from the previous two programs as well as traffic volume and classification data to calculate design traffic loads for existing pavement sections. Program McPAD performs mechanistic pavement designs using the mechanistic damage models developed on this project. This volume is the second in a two volume series. Volume 1 summarizes the research results and findings from the entire study.					
17. Key Words Pavement Loading, Tire Pressures, Equivalence Factors, Mechanistic Analysis Heavy Loads, ESAL, Equivalent Loading.			18. Distribution Statement Document is available to the U.S. public through the National Technical Information Service, Springfield, Virginia 22161		
19. Security Classification (of this report) Unclassified		20. Security Classification (of this page) Unclassified		22. Price	
				21. No. of Pages 165	
23. Registrant's Seal 					

ACKNOWLEDGEMENTS

The authors would like to thank the many people who contributed to the success of this project. Special thanks go to the ADOT project coordinators, Mr. Richard Powers, Mr. Larry Scofield, and Dr. Subodh Kumar, who provided guidance throughout the period of the contract. Thanks also to the ADOT personnel who provided valuable input and assistance during the course of the project. These people include:

Mr. Frank R. McCullagh

Mr. John Eisenberg

Mr. Edward P. Green

Mr. George B. Way

Mr. James M. Glasgow

Mr. Jim Delton

Mr. Gary L. Cooper

Mr. Al Gastelum

The authors appreciate the cooperation and important input from all of the ADOT personnel.

This project was conducted by a number of people within ARE Inc. Mr. Fred N. Finn and Mr. R. Frank Carmichael III served as Co-Principal Investigators. Project engineers were Mr. Stuart W. Hudson and Mr. Stephen B. Seeds. The major programming effort on the project was performed by Mr. Robin High with assistance from Mr. Len Moser. Engineering assistance and computer analysis was provided by Mr. Luis Medus, Mr. Dan Halbach, and Mr. Ron White. Field tasks were accomplished by Mr. Scot Gibson. Valuable support on the project was provided by Ms. Diana Brast and Ms. Lorie Lantz in the secretarial responsibilities and by Mr. Mike McCullough in Drafting. Special thanks go to all these ARE Inc personnel without whom this project would not have been possible.
